GETTING READY TO MOVE IN

Checklist

- Fill out the All About Me. This information helps us get to know the residents and creates meaningful relationships with them
- Bring with you a photo that your loved one will recognize. We will post this outside your loved ones room. You can also scan and email them to the Director of Recreation.
- Come with a list of food likes and dislikes
- Creating a good first impression is helpful when entering your new room. Please bring items that you or your loved one will recognize and that will make the room feel more like home, such as bed spreads/quilts, artwork, clock, family photographs and lamps.
- Many residents choose to spend time in their rooms while they adjust to their new home. You are welcome to bring reading material, iPads, radios, TVs and computers. These items will help to pass the time when planned programs are not running.
- If you are bringing a wall mount TV, the family is responsible for coordinating the cable installation through a local company.
- We encourage residents and families to set up a Home Trust Account through the Front Office. This allows residents access to funds during posted bank hours. We can charge the account for services such as special outings and meal programs.
- If you are interested in sharing a meal with your loved one, please let the Charge Nurse know. The Charge Nurse can review this process with you and make necessary arrangements.
- If you are bringing in electrical items, please ensure they are in good working order, have a CSA sticker, and have either a grounded plug or polarized plug. Currently, we are unable to accommodate supplementary heating appliances such as electric fireplaces.
- It is important that personal items (clothing, blankets, etc.) are labelled. Please speak with the staff and they will make arrangements to have them labelled.
- We will need copies of all current Powers of Attorney for our files.
